minimalist, photograph as you go shooting style does not lend itself to true macro photography. I like to travel light with as little gear as

... MACRO VS. CLOSE-UP

PHOTOGRAPHY To be safe, stick to two to three filters if you need to stack the close-up filters. That way, you can retain most of the quality for your macro photography.

Composing with Macro Filters. The rules of composition in photography apply to all sorts of genres, including macro photography. But if you're used to taking photos of people, you may ... A Guide to Using Macro Filters for Close-Up Photography The camera lens you use is the real defining difference between close up and macro photography. Anyone can take a close-up picture, such as with a

telephoto lens. But generally, macro photography can only be created with a macro lens. These pricy lenses allow you to capture the detail of an insect's head, or the texture of a flower petal. Knowing the Difference Between Macro, Micro, and Close-Up ... Close-up is a photo term that describes filling the frame with the subject. A close-up isolates the subject from its environment. Any lens or any camera is capable of taking a close-up. Macro defines how large a subject is captured in the camera. Macro is expressed as a ratio like 1:1, 1:2, or 1:4, and it's really pretty easy to keep it all ... Close-Up and Macro Photography Tips - PictureCorrect Most people associate close-up and macro photography with spring and

shooting outdoors, capturing subjects such as small insects, flowers, and other plants in the outdoors; however, macro

... Getting closer: close-up and macro photography | The Star These are actually close up lenses. Most of these will have a maximum magnification ratio of 1:4 or 1:3 (0.25x or 0.33x). By the definition, those ratios are classified as close up photography.

Definitions are for communicating with others. Close up photography is just as enjoyable as any other form of photography. The important part is taking ... What is the Difference Between Close Up, Macro, & Micro ... CLOSE UP AND MACRO. There are various definitions used to describe close-up and macro photography. In the

context of this article, the term "Close-up" photography will be used for anything up close up to life-size reproductions (i.e. from about 1:10 down to 1:1 magnification ratio) and the term "Macro" ("micro" in Nikon terminology) photography will refer to reproductions beyond life

... Beginner's Guide to Close-up & Macro Photography Additionally, I like to slightly 'overexpose' and make my close-up and macro photography a bit brighter. This way I can control my exposure points. Having the ability to 'overexpose' or 'underexpose' (called exposure compensation) is so easy to do in the new Camera+ 6. You simply swipe the wheel to darken or lighten - so easy and ... How To Shoot Close-Up and

... What is macro photography?

First, an explanatory note for all those with a modicum of photo history and tech basics: the term macro used to refer to the capture of an insect or whatever that resulted in an image on the 35mm film frame (24x36mm) that ranged from 1:10 to 1:1 the size of the original subject. The term micro referred to a film image that was larger than 1:1; micro photography

... Macro Photography for Beginners

- Part 1 One area of photography I can't do well with an iPhone is close-up / macro. I paint miniature models and want to be able to take photos of them. The iPhone is almost there but the depth of focus isn't good as you can't control aperture. Cheap close-up / macro
