Lecture 1 Geometry of Algebraic Curves notes Lecture 1 9/2 x1 Introduction The text for this course is volume 1 of Arborello-Cornalba-Gri ths-Harris, which is even more expensive nowadays. We will be covering a subset of the book, and probably adding some additional topics, but

this will be the basic source for most of the stu we do. There will be Geometry of Algebraic Curves - University of Chicago The text for this class is ACGH, Geometry of Algebraic Curves, Volume I. There will be weekly home-works and no nal exam. Anand Deopurkar will hold a weekly section. We are going to talk about compact Riemann surfaces, which is the same thing as a smooth projective algebraic curve over C.
