### Light Ship With Fog

Signal Professional forecasters warn sailors of impending foggy conditions, but fog forecasting with a degree of success is possible if there is a humidity meter on the craft. When humidity reaches 90 to 95 percent, and sea water temperature is 5°C to 10°C, there is a high chance of fog. Fog Horn Sound Signals - Foghorn Blast Sequences - Fog ... A foghorn or fog signal is a device that uses sound to warn vehicles of navigational hazards like rocky coastlines, or boats of the presence of other vessels, in foggy conditions. The term is most often used in relation to marine transport. When visual navigation aids such as lighthouses
