Measurement. The process of measurement is basically a

comparison process. To measure a physical quantity, we have to find

out how many times a standard amount of that physical quantity is

present in the quantity being measured. The number thus

obtained is known as the magnitude and the standard chosen is called

Dynamics is the branch of physics in which we study the motion of a body by taking into consideration the cause i.e., force which produces the motion. • Force. Force is an external cause in the form of push or pull, which produces or tries to produce motion in a body at rest, or stops/tries to stop a moving body or changes/tries to change the
