Transactional Analysis In
Psychotherapy A "Transactional
analysis" (TA), is a theory in
psychology that examines the
interactions, or 'transactions',
between a person and other people.
The underlying precept is that
humans are social creatures and
that a person is a multi-faceted
being that changes when in contact
with another person in their
world. Transactional Analysis in
Psychotherapy: A Systematic
... Transactional analysis,
developed by psychiatrist Eric
Berne, is a form of modern
psychology that examines a
person's relationships and
interactions. Berne took inspiration
from Sigmund

existentialism. The Existential

Phenomenology of Transactional

a psychoanalytic theory and method of therapy wherein social transactions are analyzed to determine the ego state of the communicator as a basis for understanding behavior. In transactional analysis, the communicator is taught to alter the ego state as a way to solve emotional problems. The method deviates from Freudian psychoanalysis which focuses on increasing awareness of the contents of unconsciously held ideas. Eric Berne developed the concept and paradigm of trans Transactional analysis - Wikipedia At its simplest level, Transactional Analysis is the method for studying interactions between individuals. By identifying
