that carries an agent that causes disease. Our goals as a vector control program is to study the dynamics of vector-borne diseases; educate the public and city personnel about vectors, the diseases they carry, how to protect themselves and help us control vectors; and help guide municipalities within ... Vector Control Why vector control? Diseases transmitted by vectors account for around 17% of the estimated global burden of communicable diseases. control Impact of combined vector-control and vaccination strategies on transmission dynamics of dengue fever: a model-based analysis. Dengue fever is a vector-borne disease prevalent in tropical and subtropical regions. It is an important public health problem with a considerable and often under-valued disease burden in terms of frequency, cost and quality-of-life. contrast, vector control methods control the frequency, amplitude and phase of the motor drive voltage. The key to vector control is to generate a 3-phase voltage as a phasor to control the 3-phase stator current as a phasor that controls the rotor flux vector and finally the rotor current phasor.
